

TEAM:.....

Country	City	Plants	Animals	Objects	Professions	First names	Score

TOTAL:

How to play:

- 1) Divide the group into teams
- 2) Give one answer sheet per team
- 3) Decide on which team is first and run the game clockwise.
- 4) **Team 2** starts by saying XYZ (aloud) then saying the alphabet (in their mind, no sounds) as slow or as fast as they like in a loop until **Team 1** says stop.
- 5) **Team 2** announces the letter that **Team 1** chose; all teams fill the sheet with an example of a word beginning with that letter, one word per category only.
- 6) Team, which has all the answers first, shouts **done**, puts the pen down and starts counting down **from 20**. Once the time is up, all pens down and each team reads their answers for each category.

***Tip** try to think about more unusual words, repeated answers have fewer points.

***Points** are given per answer, per category

No answer

0 points for team who has no answer

In one of categories

15 points for each other team who has a unique answer

10 points for each team who has a repeated answer

Unique answer

10 points per each unique answer (unless one of the teams has no answer to this category, then it's 15points)

Repeated answer

5 points per repeated answer (unless one of the teams has no answer to this category, then it's 10 points)

- 7) Add your points, write the score down. Now **Team 3** says the alphabet, **Team 2** says stop.
